

## ISLAND TIME

"This design showcases how natural materials, teamed with stainless-steel, can create visual appeal in an otherwise minimal and modern, white gloss kitchen. The large island is the focal point of the open-plan living area with a striking contrast between the granite benchtop that marks the food preparation area, and the heavier, raised custom stained timber top of the seating area. The island conceals a bar while the wine fridge becomes both a visual and practical feature of this kitchen, designed for entertaining. With its various uses and storage options, the island is an integral part of the design and has become the social hub of the home. The dishwasher and fridge have been integrated so they don't detract from the standout visual aspects against a backdrop of smooth and continuous cabinetry."

**Designer: Denise Piper-Smith for Kitchen Link**

### EXPERT TIP

Think outside the square when it comes to island benches, both in terms of finish and use of storage space.

### SHOP THE LOOK
